

# Understanding the EHR Incentive Final Rule for Eligible Professionals

**Key  
Health  
Alliance**

Regional Extension  
Assistance Center for HIT

Meaningful Use Boot Camp  
October 11, 2011

# Introductions

- Your name
- Where you work
- Your role at your facility
- What you are hoping to learn

# Conflict of Interest

- Dr. Kleeberg is the Clinical Director for the Minnesota - North Dakota Regional Extension Assistance Center for HIT (REACH). REACH is a federally subsidized non-profit entity designed to assist Hospitals and Professionals in becoming meaningful users of EHRs. He will be mentioning it in this talk.
- No other conflict of interest

# Objectives

- Understand the history behind the Incentives
- Be able to calculate the Medicare and Medicaid incentives for a professional as well as the penalties
- Understand how to register and attest for the incentives
- Identify the criteria and quality measures that will need to be reported to be a “meaningful user”
- Understand how achieving these will impact workflow

# Outline

- **Background to the Final Rule**
- Financial Incentives
- Elements of Meaningful Use
- Proposed Stage II Criteria
- Quality Measures
- Knowing if Your EHR is Certified
- Registering and Attesting
- Capturing the Information
- Closure

# The History:

## National Academies Reports

- 1999 “... at least 44,000 and perhaps as many as 98,000 hospitalized Americans die every year from medical errors.”  
*To Err is Human: Building a Safer Health System*
- 2001 “A concerted national commitment to building information infrastructure is needed to support health care delivery”  
*Crossing the Quality Chasm*
- 2007 “Medication errors injure 1.5M people and cost \$3.5B per year in the U.S.” *Preventing Medication Errors*
- 2009 “Even in organizations with advanced HIT, it is rarely used to provide clinicians with evidence-based decision support or for data-driven process improvement.” *Crossing the Health Care IT Chasm*

# Are we getting value for our dollar?

## Cost vs. Quality

Spending as a % of GDP<sup>3</sup>

- Per capita health care spending
  - \$2.5T (2009)<sup>1</sup>
  - 17.6% GDP
  - \$8,086 per person
- Life expectancy 37th of 191 in quality<sup>2</sup>

<sup>1</sup> CMS Health Expenditures 1960-2009 (<http://www.cms.gov/NationalHealthExpendData/downloads/nhegdp09.zip>)

<sup>2</sup> World Health Organization Data, 2000 (<http://www.who.int/whr>)

<sup>3</sup> OECD Health Data 2010: [http://www.oecd.org/document/16/0,3343,en\\_2649\\_34631\\_2085200\\_1\\_1\\_1\\_1,00.html](http://www.oecd.org/document/16/0,3343,en_2649_34631_2085200_1_1_1_1,00.html)

# Underinvestment in HIT

## Per Capita Spending on Health Information Technology

Source: Anderson, G. F., Frogner, B. K., Johns, R. A., & Reinhardt, U. E. (2006). Health Care Spending And Use Of Information Technology In OECD Countries. Health Affairs, 25(3), 819-831.

# Patients Want More Accessible, Coordinated, Well-Informed Care

Percent reporting it is very important/important that:	Total very important or important
You have easy access to your own medical records	94%
All your doctors have easy access to your medical records	96%
You have information about the quality of care provided by different doctors/hospitals	95%

Source: Commonwealth Fund Survey of Public Views of the U.S. Health Care System, 2008.

# The Bi-Partisan Support:

2004 “...an Electronic Health Record for every American by the year 2014. By computerizing health records, we can avoid dangerous medical mistakes, reduce costs, and improve care.” George W Bush - State of the Union address, Jan. 20, 2004

2009 “Computerize all health records within five years.” Barack Obama - George Mason University, January 12, 2009

# Placing our Bet on HIT: The “Stimulus Package”

- The stimulus package (Feb 2009)
  - American Recovery and Reinvestment Act (ARRA) - \$787 B
  - Health Information Technology for Economic and Clinical Health (HITECH) Act
    - \$29.2 B (\$17.2 B net) starting in 2011 to incent Medicare- and Medicaid-participating physicians and hospitals to use certified EHR systems in a “meaningful” way

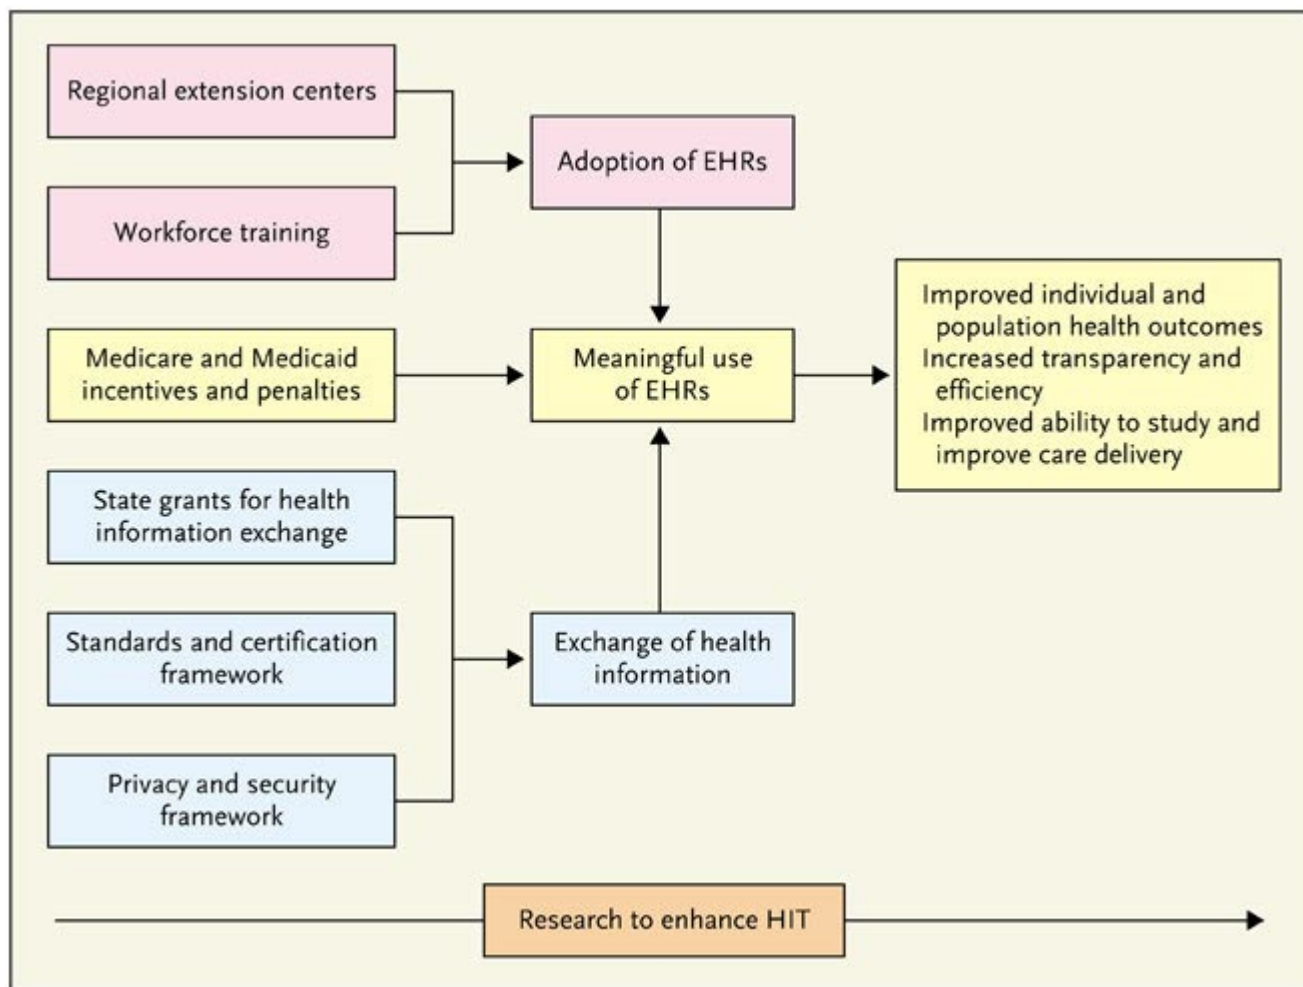

# Meaningful Use Overview: Statutory Framework

In HITECH, Congress established three fundamental criteria of requirements for meaningful use:

1. Use of certified EHR technology in a meaningful manner
2. Certified EHR technology is connected in a manner that provides for the electronic exchange of health information to improve the quality and coordination of care
3. In using certified EHR technology, the provider submits clinical quality measures and other measures as determined by the secretary

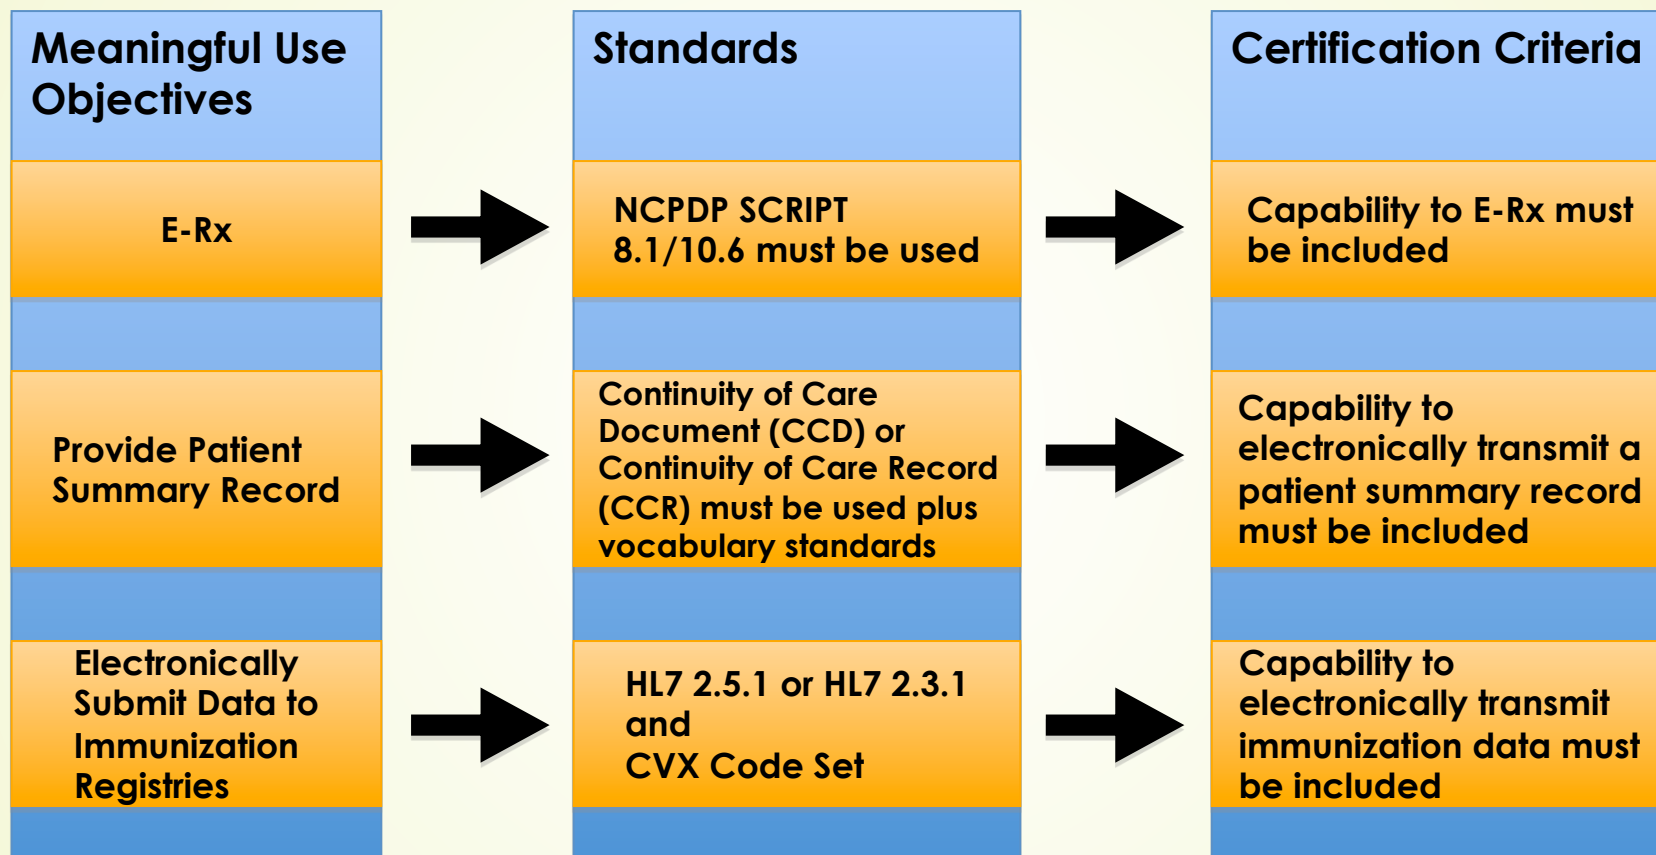

Source: Brian Wagner, Senior Director of Policy and Public Affairs, eHealth Initiative (eHI) presentation to the MN Exchange and Meaningful Use Workgroup January 15, 2010

# The HITECH Act's Framework

Blumenthal D. Launching HITECH. N Engl J Med posted online Dec 30 2009. <http://healthcarereform.nejm.org/?p=2669>

# Aligning Certification and Standards

Source: Farzad Mostashari, ONC Presentation to HIT Policy Committee January 13, 2010

# The Final Rule

- Recommendations from the Office of the National Coordinator of Health Information Technology (ONC formally known as ONCHIT) Policy Committee-July 16, 2009
- CMS released the Medicare & Medicaid Electronic Health Record (EHR) Incentive Program Notice of Proposed Rulemaking (NPRM) –January 13, 2010
  - CMS received 2,000+ comments in the 3 month comment period
- Final Rule Published –July 28, 2010

# Outline

- Background to the Final Rule
- **Financial Incentives for Professionals**
- Elements of Meaningful Use
- Proposed Stage II Criteria
- Quality Measures
- Knowing if Your EHR is Certified
- Registering and Attesting
- Capturing the Information
- Closure

# Incentive Payments to Eligible Professionals

- Made either directly to the professional or the professional may reassign it to another entity
- Professionals who work in multiple sites and achieve MU by combining the work they did at multiple sites, still may only assign their payment to one entity
- Under Medicare the payment for the first year of demonstrating MU, will be made when the professional reaches his/her allowable charges limit or the end of the year, whichever comes first

# Incentive Program Key Provisions

## Eligibility

- Eligible professionals must choose between Medicare & Medicaid Incentives, but may switch once

## Timeframe for Demonstrating Meaningful Use (MU):

- In the 1st year of demonstrating meaningful use, each provider must demonstrate MU over any continuous 90 period.
  - Note: This could be the second payment year if money was received from Medicaid for adopt, implement, upgrade
- For subsequent years, individual providers must demonstrate MU over the entire reporting year.

# Definition of a Medicare Eligible Professional

- A physician, defined by the Social Security Act Sec 1861(r):
  - A doctor of medicine or osteopathy
  - A doctor of dental surgery or dental medicine
  - A doctor of podiatric medicine
  - A doctor of optometry
  - A chiropractor
- Does not provide more than 90% of services with a place of service (POS) code of 21 or 23 (considered hospital inpatient or ED based)
- If at multiple sites, must have certified EHR technology available for  $\geq 50\%$  of their patient encounters
- Incentive amount is 75% of the physician's Medicare part B allowable RBRVS charges up to the payment year limit
  - Medicare Advantage plan charges are excluded from the calculation
  - Professional services rendered in RHCs and hospital owned clinics using provider based billing are excluded from the calculation

# Maximum Medicare Incentives for EPs in a non shortage area<sup>1</sup>

2010	2011	2012	2013	2014	2015	2016	2017	Total
	Stage 1 \$18k	Stage 1 \$12k	Stage 1? \$8k	Stage 2 \$4k	TBD \$2k	TBD	TBD	\$44k
		Stage 1 \$18k	Stage 1 \$12k	Stage 2 \$8k	TBD \$4k	TBD \$2k	TBD	\$44k
			Stage 1 \$15k	Stage 1 \$12k	TBD \$8k	TBD \$4k	TBD	\$39k
				Stage 1 \$12k	TBD \$8k	TBD \$4k	TBD	\$24k
					TBD	TBD	TBD	0
Penalty (deduction from Medicare charges) if not at stage 3 by January 1 of that year:					1%	2%	3%	

1. Professionals with >50% Medicare services (as opposed to charges) in a health professional shortage area see a 10% increase in the maximum payment

# Medicaid Eligible Professional

- An Eligible Professional for Medicaid is defined in statute as a
  - Physician (MD, DO and in some states, optometrists)
  - Dentist
  - Certified nurse mid-wife
  - Nurse practitioner
  - Physician assistant if the assistant is practicing in either a rural health clinic (RHC) or a federally qualified health center (FQHC) that is led by a physician assistant
- PA would be leading an FQHC or RHC if:
  - A PA is the primary provider in a clinic (for example, when there is a part-time physician and full-time PA, we would consider the PA as the primary provider)
  - A PA is a clinical or medical director at a clinical site of practice
  - A PA is an owner of an RHC
- A PA is ineligible for Medicaid in North Dakota

# Medicaid Eligible Professional, cont.

- In order to be eligible for the Medicaid incentives, one must have
  - Greater than 30% Medicaid patient volume
  - Greater than 20% if a pediatrician (physician)
  - Greater than 30% “needy individuals” if > 50% encounters at an FQHC or RHC.
    - The Social Security Act defines a needy individual<sup>1</sup> as one who
      - Is receiving assistance under Medicaid
      - Is receiving assistance under title XXI the State Child Health Insurance Program (SCHIP)
      - Is furnished uncompensated care by the professional;
      - Has charges reduced by the professional based on ability to pay.

1. [http://www.socialsecurity.gov/OP\\_Home/ssact/title19/1903.htm#act-1903-t-3-f](http://www.socialsecurity.gov/OP_Home/ssact/title19/1903.htm#act-1903-t-3-f)

# EP Medicaid Volume Calculation

- Calculated by encounters not charges
  - Volume can be calculated by clinic in most instances
  - No minimum patient volume required
- Numerator: Services rendered on any one day to an individual where Medicaid or a Medicaid demonstration project under section 1115 of the Act paid
  - for part or all of the service; or
  - all or part of their premiums, copayments, and/or cost-sharing.
- Denominator: All encounters

# Calculating Eligible Professional Medicaid Incentives – Revised 12/10

- Formerly, required professionals to demonstrate that they had spent 15% or \$3750 of the EHR cost
- Any provider who has the patient mix to be eligible for Medicaid will be assumed to have met the cost threshold.
- Consequently, for professionals with >30% threshold, the incentive amount is:
  - \$21,250 for the first payment year
  - \$8500 for each of the following 5 years
- For pediatric physicians with between 20% and 30% Medicaid, the incentive amount is one third lower:
  - \$14,167 in the first payment year
  - \$5,667 for each of the following 5 years
- The first payment year can be as late as 2016

# Medicaid: 1st Payment Year For “Adopt, Implement, Upgrade”

- Eligible professionals can receive incentives for adoption, implementation and upgrade of certified EHR technology in their first year of participation
- “Adopt, implement, or upgrade” means:
  - Install or commence utilization of certified EHR technology capable of meeting meaningful use requirements; or
  - Expand the functionality of certified EHR technology capable of meeting meaningful use requirements at the practice site, including staffing, maintenance, and training.
  - Upgrade from existing EHR technology to certified EHR technology per the ONC EHR certification criteria.

# Maximum Medicaid Incentives for EPs with $\geq 30\%$ volume

		Year of Adopt, implement, Upgrade or MU Demonstration						
		2011	2012	2013	2014	2015	2016	2011
Calendar Year	2011	\$21,250						\$21,250
	2012	\$8,500	\$21,250					
	2013	\$8,500	\$8,500	\$21,250				\$8,500
	2014	\$8,500	\$8,500	\$8,500	\$21,250			
	2015	\$8,500	\$8,500	\$8,500	\$8,500	\$21,250		\$8,500
	2016	\$8,500	\$8,500	\$8,500	\$8,500	\$8,500	\$21,250	\$8,500
	2017		\$8,500	\$8,500	\$8,500	\$8,500	\$8,500	
	2018			\$8,500	\$8,500	\$8,500	\$8,500	
	2019				\$8,500	\$8,500	\$8,500	\$8,500
	2020					\$8,500	\$8,500	
	2021						\$8,500	\$8,500
		Total	\$63,750	\$63,750	\$63,750	\$63,750	\$63,750	\$63,750

Regional Extension Assistance Center for HIT

# Notable Differences Between the Medicare & Medicaid Incentives

	Medicare	Medicaid
Reimbursement for eligible professionals	Based on Medicare Part B allowed charges	Based on patient mix (EHR cost assumed)
Types of eligible professionals	Physicians, dentists, podiatrists, optometrists, chiropractor	Physicians, dentists, nurse midwife, nurse practitioner and some PAs
First payment year	Demonstrate meaningful use over a continuous 90 days in the calendar year	Can be for adopt, implement or upgrade only
Subsequent payment years	Must be consecutive	Needn't be consecutive for EPs
Payments	No payments for years after 2016	Payments can start as late as 2016 and no payments after 2021
Penalties if not a MUser	Yes	No
Consistent across nation	Yes	States choose to implement

# Deciding Between Medicare and Medicaid

- For providers eligible for both programs, the incentive is greater under Medicaid than Medicare
- If the provider's patient population drops below the Medicaid threshold they are eligible to switch but that can only occur once during the program
- Any payment year skipped in the Medicaid program would be counted as a payment year in the Medicare program if the professional switches resulting in loss payment years

# Small Groups

# Outline

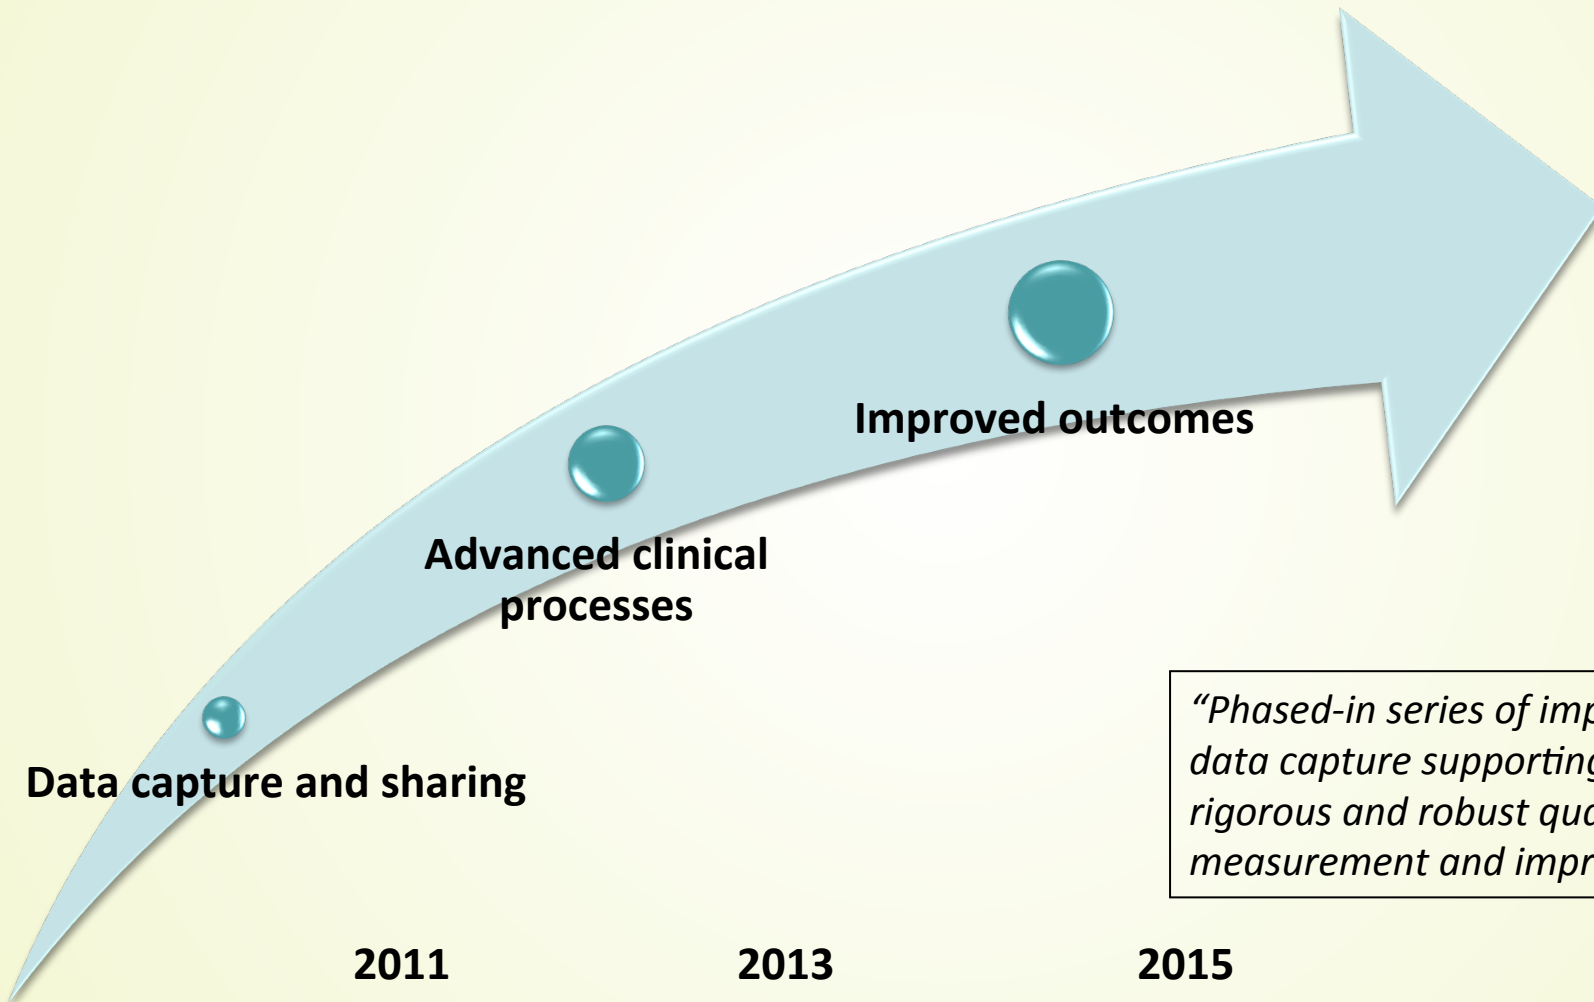

- Background to the Final Rule
- Financial Incentives for Professionals
- **Elements of Meaningful Use**
- Proposed Stage II Criteria
- Quality Measures
- Knowing if Your EHR is Certified
- Registering and Attesting
- Capturing the Information
- Closure

# Meaningful Use Criteria

- Adapted from National Priorities and Goals of the National Priorities Partnership:<sup>1</sup>
  - Improving quality, safety, efficiency, and reducing health disparities
  - Engage patients and families in their health care
  - Improve care coordination
  - Improve population and public health
  - Ensure adequate privacy and security protections for personal health information
- Are divided into Core Criteria and Menu Criteria

1. National Priorities Partnership. National Priorities and Goals: Aligning Our Efforts to Transform America's Healthcare. Washington, DC: National Quality Forum; 2008.

# Bending the Curve Towards Transformed Health

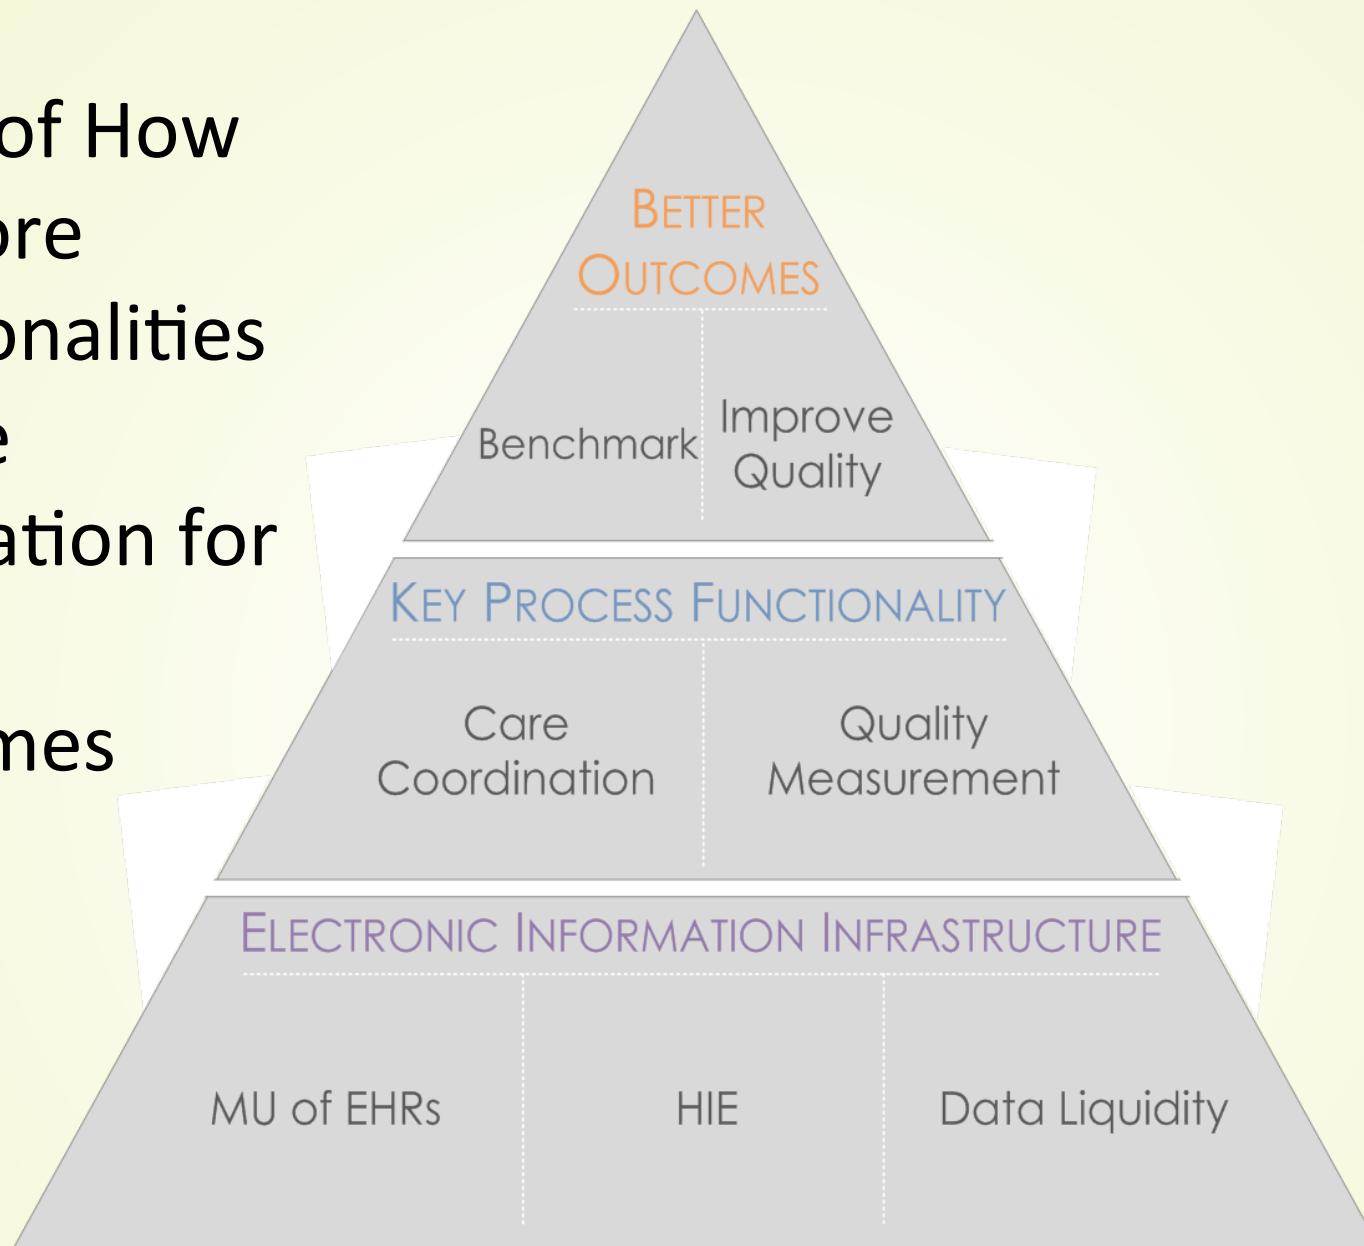

*“Phased-in series of improved clinical data capture supporting more rigorous and robust quality measurement and improvement.”*

Source: Connecting for Health, Markle Foundation “Achieving the Health IT Objectives of the American Recovery and Reinvestment Act” April 2009

Vision of How  
EHR Core  
Functionalities  
Lay the  
Foundation for  
Better  
Outcomes

Adapted from the HIT Policy Committee Presentation June 8, 2011

# Medicaid Considerations

- State Medicaid Agencies may propose an alternative definition of meaningful use for Medicaid incentives, however...
  - States cannot propose fewer or less rigorous criteria
  - States cannot propose anything that would require additional functionality beyond that of certified EHR technology
  - CMS must approve Medicaid Agencies' proposed definitions
  - State-specific MU definition would apply solely to EPs, children's hospitals and cancer hospitals

# “Stage 1” Meaningful Use Criteria

- 25 objectives and measures for eligible professionals (EP)
  - 15 are required (“core”), up to 5 of the remaining 10 may be deferred to Stage 2 (“menu”)
  - 9 require yes/no attestation; 16 require data submission
- To meet certain objectives/measures, 80% of all patients seen during the reporting period must have certain data elements in the certified EHR technology

# Core and Menu Criteria

- Professionals must complete each of the core criteria unless unable to due to scope of practice, population served or number in the denominator. For example:
  - Chiropractor and e-prescribing
  - Dentists and immunizations

# Core Criteria (page 1 of 3)

	Objective	Ambulatory Measure
Improve quality, safety, efficiency and reduce health disparities	CPOE <sup>3</sup> (Lic HC Prof)	>30% of patients on any meds with ≥ one CPOE med order (n/d EHR) <sup>1</sup>
	Drug (D-A, D-D) Interactions	Turned on (y/n)
	ePrescribe <sup>3</sup>	>40% of permissible scripts (n/d EHR) <sup>1</sup>
	Demographics	>50% of patients seen: language, gender, race, ethnicity, DOB (n/d all) <sup>2</sup>
	Problem List	>80% of patients seen at least one or “none” as structured data (n/d all) <sup>2</sup>
	Med List	
	Med Allergies	

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. (n/d all): Numerator divided by denominator of all unique patients seen during the measurement period
3. CPOE and ePrescribe excluded if < 100 scripts written

# Core Criteria (page 2 of 3)

	Objective	Ambulatory Measure
Improve quality, safety, efficiency and reduce health disparities	Vitals <sup>2</sup>	>50% of patients ≥ 2yo seen: height, weight, BP, BMI, & for age 2-20: growth charts w/BMI (n/d EHR) <sup>1</sup>
	Smoking	>50% of patients ≥ 13yo seen, record status <i>as structured data</i> (n/d EHR) <sup>1</sup>
	Decision Support	1 CDS rule relevant to the specialty specific quality metric <i>with the ability to track compliance</i> (y/n)
	Quality Reporting	Report ambulatory quality measures to CMS or states (y/n) 2011: Attest numerator/denominator 2012: Electronic submission

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. Exclusion if pts ht, wt, & BP have no relevance to scope of practice

# Core Criteria (page 3 of 3)

	Objective	Ambulatory Measure
<b>Engage Patients and Families in Their Health Care</b>	eHealth summary	>50% of patients who request it (incl: test results, prob list, med list, med allergies) w/i 3 business days (n/d EHR) <sup>1</sup>
	Clinical summaries	>50% of office visits, a patient gets a visit summary within 3 business days (n/d EHR) <sup>1</sup>
<b>Improve Care Coordination</b>	Exchange with providers <sup>2</sup>	Capability of electronic exchange of key information (Ex: prob list, med list, allergies, test results <sup>3</sup> ). One test per measurement period (y/n)
<b>Privacy/security protections for PHI</b>	Protect Patient Personal Health Information	Conduct or review a security risk analysis per <a href="#">45 CFR 164.308 (a)(1)</a> and correct deficiencies (y/n)

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. Clinical information must be sent between different legal entities with distinct certified EHR technology or other system that can accept the information and not between organizations that share certified EHR technology
3. “Diagnostic test results “ are all data needed to diagnose and treat disease, such as blood tests, microbiology, urinalysis, pathology tests, radiology, cardiac imaging, nuclear medicine tests, and pulmonary function tests.

# Menu Criteria

- Professionals may defer up to 5 of the menu criteria until stage 2
- At least one of the criteria from population and public health must be included in order to qualify as a meaningful user
- If a professional is unable to complete one of the menu items due to scope of practice, they may still defer 5 menu items
- States can seek CMS prior approval to require 4 MU criteria be core for their Medicaid professionals:
  - Generate lists of patients by specific conditions
  - Reporting to immunization registries, reportable lab results, and syndromic surveillance

# Menu Criteria (page 1 of 2)

	Objective	Ambulatory Measure
<b>Improve quality, safety, efficiency and reduce health disparities</b>	Formularies	Implement drug formulary checks with at least one internal or external formulary (y/n)
	Lab Results	>40% of labs with numeric or +/- result in chart as structured data (n/d EHR) <sup>1</sup>
	Patient Lists <sup>2</sup>	Generate at least one pt lists based on a specific condition (y/n)
	Reminders	>20% of active pts ≥ 65 or ≤ 5yo sent reminders for follow up care (n/d EHR) <sup>3</sup>
<b>Engage Patients and Families in Their Health Care</b>	eAccess	>10% patients seen with electronic access to lab results, prob lists, med list, med allergies w/i 4 business days of it being updated in the EHR (n/d all) <sup>4</sup>
	Patient Ed	>10% patients seen provided with ed resources identified with the EHR (n/d all) <sup>4</sup>

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. States may seek approval from CMS to require a specific condition be tracked for Medicare
3. Numerator divided by denominator of all active patients whose records are maintained in a certified EHR
4. (n/d all): Numerator divided by denominator of all unique patients seen during the measurement period

# Menu Criteria (page 2 of 2)

	Objective	Ambulatory Measure
<b>Improve Care Coordination</b>	Medication reconciliation	>50% of transitions of care or a relevant encounter (n/d EHR) <sup>1</sup>
	Summary care record	>50% of referrals and transitions of care <sup>1</sup> (n/d EHR) <sup>1</sup>
<b>Improve Population and Public Health<sup>2</sup></b>	Immunization Records <sup>3</sup>	≥ 1 test of submission to state immunization registry (unless no registries are capable) with continued submission if successful (y/n)
	Syndromic Surveillance <sup>3</sup>	≥ 1 test of submission to public health (unless no ph agency is capable) with continued submission if successful (y/n)

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. Unless an EP, eligible hospital or CAH has an exception for all of these objectives and measures they must complete at least one in this group as part of their demonstration of a meaningful EHR use to be eligible for incentives.
3. States may specify how to test the data submission and to which specific destination

# Criteria:

## Core:

### All Patients:

- Demographics
- Problem list
- Medication list
- Medication allergy list

### EHR Patients:

- CPOE
- E-Prescribing
- Vital signs
- Smoking status
- E-copy of their health information
- Clinical summaries

### On (Yes or No):

- Clinical Quality Measures
- Drug (D-A, D-D) Interactions
- One clinical decision support rule
- Electronically exchange key clinical information
- Protect electronic health information

## Menu:

### All Patients:

- E-access to their health information
- Provide patient-specific education resources

### EHR Patients:

- Labs as structured data
- Patient reminders
- medication reconciliation
- Summary of care record

### On (Yes or No):

- Drug - formulary checks
- Patient list by specific condition
- Test of submission of electronic data to immunization registries. \*
- Test of providing electronic syndromic surveillance data to public health agencies. \*

\* At least 1 public health objective must be selected

# Core:

## Clinical Summaries, Part 1

- **Description (from the Final Rule):**
  - The Final Rule defines a Clinical Summary as an after-visit summary that provides a patient with relevant and actionable information and instructions containing, but not limited to:
    - The patient name
    - Provider’s office contact information
    - Date and location of visit
    - An updated medication list and summary of current medications
    - Updated vitals
    - Reason(s) for visit
    - Procedures and other instructions based on clinical discussions that took place during the office visit
    - Updates to a problem list
    - Immunizations or medications administered during visit
    - Summary of topics covered/considered during visit
    - Time and location of next appointment/testing if scheduled, or a recommended appointment time if not scheduled
    - List of other appointments and testing patient needs to schedule with contact information
    - Recommended patient decision aids
    - Laboratory and other diagnostic test orders
    - Test/laboratory results (if received before 24 hours after visit)
    - Symptoms

# Testing Criteria for a Clinical Summary\*

Test Procedure for §170.304.h Clinical Summaries  
APPROVED Version 1.1 ■ September 24, 2010

## Test Procedure for §170.304 (h) Clinical Summaries

This document describes the test procedure for evaluating conformance of complete EHRs or EHR modules<sup>1</sup> to the certification criteria defined in 45 CFR Part 170 Subpart C of the Final Rule for Health Information Technology: Initial Set of standards, Implementation Specifications, and Certification Criteria for Electronic Health Record Technology as published in the Federal Register on July 28, 2010. The document<sup>2</sup> is organized by test procedure and derived test requirements with traceability to the normative certification criteria as described in the Overview document located at [http://healthcare.nist.gov/docs/TestProcedureOverview\\_v1.pdf](http://healthcare.nist.gov/docs/TestProcedureOverview_v1.pdf). The test procedures may be updated to reflect on-going feedback received during the certification activities.

## Reading down several pages:

TE170.304.h – 1.04: Using the Vendor-supplied test data and/or NIST-supplied test data/examples and the EHR function(s) identified by the Vendor, the Tester shall create a clinical summary for an office visit, including

- Diagnostic test results
- Problem list
- Medication list
- Medication allergy list

TE170.304.h – 1.05: Using the NIST-supplied Inspection Test Guide, the Tester shall verify that the clinical summary has been created correctly and without omission

\* [http://healthcare.nist.gov/use\\_testing/effective\\_requirements.html](http://healthcare.nist.gov/use_testing/effective_requirements.html)

# CMS Clinical Summary FAQ

- From the CMS website:
  - “...The EP must include all of the above that can be populated into the clinical summary by certified EHR technology. If the EP's certified EHR technology cannot populate all of the above fields, then at a minimum the EP must provide in a clinical summary the data elements for which all EHR technology is certified for the purposes of this program (according to §170.304(h)):
    - Problem List
    - Diagnostic Test Results
    - Medication List
    - Medication Allergy List”

[http://questions.cms.hhs.gov/app/answers/detail/a\\_id/10558/kw/10558/](http://questions.cms.hhs.gov/app/answers/detail/a_id/10558/kw/10558/)

# Meaningful Use Specification Sheet

- The authoritative source on MU Criteria
- Downloadable PDF index that links to the details online:
  - <http://www.cms.gov/EHRIncentivePrograms/Downloads/EP-MU-TOC.pdf>
- Updated by CMS to account for any corrections or changes
- Can be text-word searched

# Example of Clinical Summaries Measure

## Eligible Professional Meaningful Use Core Measures Measure 13 of 15

Stage 1  
Date issued: April 18, 2011

### Clinical Summaries

<b>Objective</b>	Provide clinical summaries for patients for each office visit.
<b>Measure</b>	Clinical summaries provided to patients for more than 50 percent of all office visits within 3 business days.
<b>Exclusion</b>	Any EP who has no office visits during the EHR reporting period.

### Table of Contents

- Definition of Terms
- Attestation Requirements
- Additional Information

### Definition of Terms

**Clinical Summary** – An after-visit summary that provides a patient with relevant and actionable information and instructions containing the patient name, provider’s office contact information, date and location of visit, an updated medication list, updated vitals, reason(s) for visit, procedures and other instructions based on clinical discussions that took place during the office visit, any updates to a problem list, immunizations or medications administered during visit, summary of topics covered/considered during visit, time and location of next appointment/testing if scheduled, or a recommended appointment time if not scheduled, list of other appointments and tests that the patient needs to schedule with contact information, recommended patient decision aids, laboratory and other diagnostic test orders, test/laboratory results (if received before 24 hours after visit), and symptoms.

**Office Visit** – Office visits include separate, billable encounters that result from evaluation and management services provided to the patient and include: (1) Concurrent care or transfer of care visits, (2) Consultant visits, or (3) Prolonged Physician Service without Direct (Face-To-Face) Patient Contact (tele-health). A consultant visit occurs when a provider is asked to render an expert opinion/service for a specific condition or problem by a referring provider.

### Attestation Requirements

NUMERATOR / DENOMINATOR / EXCLUSION

- DENOMINATOR: Number of office visits by the EP during the EHR reporting period.

- NUMERATOR: Number of office visits in the denominator for which the patient is provided a clinical summary within three business days.
- EXCLUSION: EPs who have no office visits during the EHR reporting period would be excluded from this requirement. EPs must enter ‘0’ in the Exclusion box to attest to exclusion from this requirement.

The resulting percentage (Numerator ÷ Denominator) must be more than 50 percent in order for an EP to meet this measure.

### Additional Information

- The provider is permitted, but not required, to limit the measure of this objective to those patients whose records are maintained using certified EHR technology.
- The provision of the clinical summary is limited to the information contained within certified EHR technology.
- The clinical summary can be provided through a PHR, patient portal on the web site, secure e-mail, electronic media such as CD or USB fob, or printed copy. If the EP chooses an electronic media, they would be required to provide the patient a paper copy upon request.
- If an EP believes that substantial harm may arise from the disclosure of particular information, an EP may choose to withhold that particular information from the clinical summary.
- Providers should not charge patients a fee to provide this information.
- When a patient visit lasts several days and the patient is seen by multiple EPs, a single clinical summary at the end of the visit can be used to meet the meaningful use objective for “provide clinical summaries for patients after each office visit.”
- The EP must include all of the items listed under “Clinical Summary” in the above “Definition of Terms” section that can be populated into the clinical summary by certified EHR technology. If the EP’s certified EHR technology cannot populate all of these fields, then at a minimum the EP must provide in a clinical summary the data elements for which all EHR technology is certified for the purposes of this program (according to §170.304(h)):
  - Problem List
  - Diagnostic Test Results
  - Medication List
  - Medication Allergy List

# Testing Criteria

- Testing criteria for each of these modules can be found at:
  - [http://healthcare.nist.gov/use\\_testing/effective\\_requirements.html](http://healthcare.nist.gov/use_testing/effective_requirements.html)

Criteria #	Certification Criteria	Test Method	Date Published
§170.302 (a)	Drug-drug, drug-allergy interaction checks		08/13/2010
§170.302 (b)	Drug formulary checks		08/13/2010
§170.302 (c)	Maintain up-to-date problem list		08/13/2010

- Good resource to check if you wish to know what really has been tested
  - Quality Measures – Vendors get to choose which three additional quality measures they wish to be tested on
  - Techies only need to look at this

Test Procedure for §170.302.a Drug-drug, drug-allergy interaction checks  
APPROVED Version 1.0 ■ August 13, 2010

## Test Procedure for §170.302 (a) Drug-drug, drug-allergy interaction checks

This document describes the draft test procedure for evaluating conformance of complete EHRs or EHR modules<sup>1</sup> to the certification criteria defined in 45 CFR Part 170 Subpart C of the Final Rule for Health Information Technology: Initial Set of standards, Implementation Specifications, and Certification Criteria for Electronic Health Record Technology as published in the Federal Register on July 28, 2010. The document<sup>2</sup> is organized by test procedure and derived test requirements with traceability to the normative certification criteria as described in the Overview document located at [http://healthcare.nist.gov/docs/TestProcedureOverview\\_v1.pdf](http://healthcare.nist.gov/docs/TestProcedureOverview_v1.pdf). The test procedures may be updated to reflect on-going feedback received during the certification activities.

The HHS/Office of the National Coordinator for Health Information Technology (ONC) has defined the standards, implementation guides and certification criteria used in this test procedure. Applicability and interpretation of the standards, implementation guides and certification criteria to EHR technology is determined by ONC. Test procedures to evaluate conformance of EHR technology to ONC's requirements are defined by NIST. Testing of EHR technology is carried out by ONC-Authorized Testing and Certification Bodies (ATCBs), not NIST, as set forth in the final rule establishing the Temporary Certification Program (*Establishment of the Temporary Certification Program for Health Information Technology, 45 CFR Part 170; June 24, 2010.*)

Questions about the applicability of the standards, implementation guides or criteria should be directed to ONC at [ONC.Certification@hhs.gov](mailto:ONC.Certification@hhs.gov). Questions about the test procedures should be directed to NIST at [hit-tst-fdbk@nist.gov](mailto:hit-tst-fdbk@nist.gov). Note that NIST will automatically forward to ONC any questions regarding the applicability of the standards, implementation guides or criteria. Questions about functions and activities of the ATCBs should be directed to ONC at [ONC.Certification@hhs.gov](mailto:ONC.Certification@hhs.gov)

# Small Groups

# Outline

- Elements of Meaningful Use
- **Proposed Stage II Criteria**
- Quality Measures
- Knowing if Your EHR is Certified
- Registering and Attesting
- Capturing the Information
- Closure

# Core Criteria (page 1 of 3)

Objective	Stage I	Policy Committee Proposed Stage II
CPOE <sup>3</sup> (Lic HC Prof)	>30% of patients on any meds with ≥ one CPOE med order (n/d EHR) <sup>1</sup>	>60% meds and labs and 1 radiology order (if any)
Drug (D-A, D-D) Interactions	Turned on (y/n)	No change
ePrescribe <sup>3</sup>	>40% of permissible scripts (n/d EHR) <sup>1</sup>	>50%
Demographics	>50% of patients seen: language, gender, race, ethnicity, DOB (n/d all) <sup>2</sup>	>80%
Problem List	>80% of patients seen at least one or “none” as structured data (n/d all) <sup>2</sup>	No change
Med List		
Med Allergies		

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. (n/d all): Numerator divided by denominator of all unique patients seen during the measurement period
3. CPOE and ePrescribe excluded if < 100 scripts written

# Core Criteria (page 2 of 3)

Objective	Stage I	Proposed Stage II
Vitals <sup>2</sup>	>50% of patients ≥ 2yo seen: height, weight, BP, BMI, & for age 2-20: growth charts w/BMI (n/d EHR) <sup>1</sup>	>80% and increased peds from ≥ 2 years to ≥ 3 years of age
Smoking	>50% of patients ≥ 13yo seen, record status <i>as structured data</i> (n/d EHR) <sup>1</sup>	>80%
Decision Support	1 CDS rule relevant to the specialty specific quality metric <i>with the ability to track compliance</i> (y/n)	Change unclear
Quality Reporting	Report ambulatory quality measures to CMS or states (y/n) 2011: Attest numerator/denominator 2012: Electronic submission	Electronic submission

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. Exclusion if pts ht, wt, & BP have no relevance to scope of practice

# Core Criteria (page 3 of 3)

Objective	Ambulatory Measure	Proposed Stage II
eHealth summary	>50% of patients who request it (incl: test results, prob list, med list, med allergies) w/i 3 business days (n/d EHR) <sup>1</sup>	Moved into another criteria (See eAccess)
Clinical summaries	>50% of office visits, a patient gets a visit summary within 3 business days (n/d EHR) <sup>1</sup>	50% of visits w/i 24 hrs, Labs w/l 4 days of result Electronic access counts
Exchange with providers <sup>2</sup>	Capability of electronic exchange of key information (Ex: prob list, med list, allergies, test results <sup>3</sup> ). One test per measurement period (y/n)	Substituted
Protect Patient Personal Health Information	Conduct or review a security risk analysis per <a href="#">45 CFR 164.308 (a)(1)</a> and correct deficiencies (y/n)	No change

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. Clinical information must be sent between different legal entities with distinct certified EHR technology or other system that can accept the information and not between organizations that share certified EHR technology
3. "Diagnostic test results " are all data needed to diagnose and treat disease, such as blood tests, microbiology, urinalysis, pathology tests, radiology, cardiac imaging, nuclear medicine tests, and pulmonary function tests.

# Menu Criteria (page 1 of 2)

Objective	Ambulatory Measure	Proposed Stage II
Formularies	Implement drug formulary checks with at least one internal or external formulary (y/n)	May use a generic sub formulary Moved to Core
Lab Results	>40% of labs with numeric or +/- result in chart as structured data (n/d EHR) <sup>1</sup>	Moved to Core
Patient Lists <sup>2</sup>	Generate at least one pt lists based on a specific condition (y/n)	Multiple lists Moved to Core
Reminders	>20% of pts $\geq 65$ or $\leq 5$ yo sent reminders for follow up care (n/d EHR) <sup>1</sup>	10% of ALL patients – not for existing appts. Moved to Core
eAccess	>10% patients seen with electronic access to lab results, prob lists, med list, med allergies w/i 4 business days of it being updated in the EHR (n/d all) <sup>1</sup>	10% of patients access to longitudinal record w/i 24 hrs, or w/i 4 days after available to EP. Moved to Core
Patient Ed	>10% patients seen provided with ed resources identified with the EHR (n/d all) <sup>1</sup>	Removed “If appropriate” Moved to Core

1. (n/d EHR): Numerator divided by denominator of all unique patients seen during the measurement period whose records are maintained in a certified EHR
2. States may seek approval from CMS to require a specific condition be tracked for Medicare

# Menu Criteria (page 2 of 2)

Objective	Ambulatory Measure	Proposed Stage II
Medication reconciliation	>50% of transitions of care or a relevant encounter <sup>2</sup> (n/d EHR)	Moved to Core
Summary care record	>50% of referrals and transitions of care (n/d EHR)	>25 electronic transactions Moved to Core
Immunization Records	≥ 1 test of submission to state immunization registry (unless no registries are capable) with continued submission if successful (y/n)	Success required Moved to Core
Syndromic Surveillance	≥ 1 test of submission to public health (unless no ph agency is capable) with continued submission if successful (y/n)	CMS to consider

# Proposed New Stage II Criteria

Objective	Ambulatory Measure
Advanced Directives	>25 unique patients have recorded whether an advance directive exists (with date and timestamp of recording) and access to a copy of the directive itself if it exists
Progress Notes	30% of EP visits have at least one electronic EP note. Scanned notes do not qualify
Secure Messaging	Patients are offered secure messaging online and at least 25 patients have sent secure messages online
Communication Preference	Patient preferences for communication medium recorded for 20% of patients
Care Team	List of care team members (including PCP, if available) available for 10% of patients via electronic exchange; (May be unstructured data for stage 2)
Cancer Reporting	CMS to Consider: Submit reportable cancer conditions (attest to at least one) in accordance with applicable law and practice

# Lunch!

# Outline

- Background to the Final Rule
- Financial Incentives for Professionals
- Elements of Meaningful Use
- Proposed Stage II Criteria
- **Quality Measures**
- Knowing if Your EHR is Certified
- Registering and Attesting
- Capturing the Information
- Closure

# Quality Measures

- Relate to healthcare quality aims such as effective, safe, efficient, patient-centered, equitable, and timely care.
- Includes measures of processes, experience, and/or outcomes of patient care, observations or treatment
  - Draws primarily from PQRI and NQF endorsed measures
  - NQF is modifying existing quality measures to meet MU requirements
- EPs would be required to submit clinical data on 2 measure groups:
  - A core set of 3 measures (or alternates)
  - 3 additional measures selected from among 38 others

# Reporting of Clinical Quality Measures

- Quality reporting will be done by attestation of summary data to CMS in 2011
- For the 2012 payment year, professionals will be required to submit these measures
  - To CMS electronically if choosing Medicare
  - To the states if choosing Medicaid
- All measures have specifications for electronic reporting
- Reporting limited to patients in the EHR
- Patient information must be submitted regardless of payer

# Core Quality Measures for EPs

Measure Number	Clinical Quality Measure Title
NQF 0013	Blood pressure measurement
NQF 0028	Tobacco use assessment and intervention
NQF 0421 PQRI 128	Adult Weight Screening and Follow-up
<b>Alternate Core Measures</b>	
NQF 0024	Weight Assessment and Counseling for Children and Adolescents
NQF 0041 PQRI 110	Influenza Immunization for Patients ≥ 50 Years Old
NQF 0038	Childhood Immunization Status

# Core: NQF 0013:

## Hypertension: BP Measurement

- **Initial Patient Population**
  - Age  $\geq$  18 years;
  - Active Diagnosis of hypertension
  - AND:  $\geq$ 2 count(s) of:
    - outpatient encounter
    - nursing facility encounter
- **Denominator**
  - All patients in the initial patient population
- **Numerator**
  - Physical exam finding: systolic blood pressure
  - AND: Physical exam finding: diastolic blood pressure
- **Exclusions**
  - None

# Core: NQF 0028a:

## Tobacco Use Assessment

- **Initial Patient Population**

- Age  $\geq$  18 years;
- AND:
  - $\geq$ 2 count(s) of:
    - Encounter office visit, health and behavior assessment, occupational therapy or psychiatric/psychologic
  - OR:
    - $\geq$ 1 count(s) of:
      - preventive services encounter 18 and older, medical, counseling or other

- **Denominator**

- All patients in the initial patient population;

- **Numerator**

- Patient characteristic: tobacco user before or simultaneously to the encounter  $\leq$ 24 months;
- OR: Patient characteristic: tobacco non-user before or simultaneously to the encounter  $\leq$ 24 months;

- **Exclusions**

- None;

# Core: NQF 0028b:

## Tobacco Use Assessment

- **Initial Patient Population**

- Age  $\geq$  18 years;
- AND:
  - $\geq$ 2 count(s) of:
    - Encounter office visit, health and behavior assessment, occupational therapy or psychiatric/psychologic
  - OR:
    - $\geq$ 1 count(s) of:
      - preventive services encounter 18 and older, medical, counseling or other

- **Denominator**

- All patients in the initial patient

population;

- AND: Patient characteristic: tobacco user  $\leq$  24 months;

- **Numerator**

- Procedure: tobacco use cessation counseling  $\leq$  24 months;
- OR: Ordered or using smoking cessation agents before or simultaneously to the encounter  $\leq$  24 months;

- **Exclusion**

- AND: None;

# Core: NQF 0421 (Population Criteria 1)

## Adult Weight Screening and Follow-Up

- **Initial Patient Population**

- Age  $\geq$  65 years;

- **Denominator**

- All patients in the initial patient population;
- AND:  $\geq$ 1 count(s) of outpatient encounter;

- **Numerator 1**

- Physical exam finding: BMI  $\geq$ 22 kg/m<sup>2</sup> and  $<$ 30 kg/m<sup>2</sup>, occurring  $\leq$ 6 months before or simultaneously to the outpatient encounter;
- OR: Physical Exam Finding: outside the above parameters occurring

$\leq$ 6 months before or simultaneously to the outpatient encounter;

- AND:

- OR: Care goal: follow-up plan BMI management;
- OR: Communication provider to provider: dietary consultation order;

- **Exclusions**

- Patient characteristic: Terminal illness  $\leq$ 6 months before or simultaneously to outpatient encounter;
- OR: Diagnosis active: Pregnancy;
- OR: Physical exam not done for patient, medical or system reason

# Core: NQF 0421 (Population Criteria 2)

## Adult Weight Screening and Follow-Up

- **Initial Patient Population**

- Age  $\geq$  18 years AND  $\leq$  64 years;

- **Denominator**

- All patients in the initial patient population;
- AND:  $\geq$ 1 count(s) of outpatient encounter;

- **Numerator 2**

- Physical exam finding: BMI  $\geq$ 18.5 kg/m<sup>2</sup> and  $<$ 25 kg/m<sup>2</sup>, occurring  $\leq$ 6 months before or simultaneously to the outpatient encounter;
- OR: Physical Exam Finding: outside the above parameters occurring

$\leq$ 6 months before or simultaneously to the outpatient encounter;

- AND:

- OR: Care goal: follow-up plan BMI management;
- OR: Communication provider to provider: dietary consultation order;

- **Exclusions**

- Patient characteristic: Terminal illness  $\leq$ 6 months before or simultaneously to outpatient encounter;
- OR: Diagnosis active: Pregnancy;
- OR: Physical exam not done for patient, medical or system reason

# Alt Core: NQF 0024: Weight Assessment and Counseling for Children and Adolescents

- **Initial Patient Population 1**
  - Age  $\geq 2$  and  $\leq 16$  years to expect screening for patients within one year after reaching 2 years until 17 years;
- **Initial Patient Population 2**
  - Age  $\geq 2$  and  $\leq 10$  years to expect screening for patients within one year after reaching 2 years until 11 years;
- **Initial Patient Population 3**
  - Age  $\geq 11$  and  $\leq 16$  years to expect screening for patients within one year after reaching 12 years until 17 years;
- **Denominator**
  - outpatient encounter w/PCP & obgyn;
  - AND NOT: Diagnosis active: pregnancy;
- AND NOT: pregnancy encounter;
- **Numerator 1**
  - Physical exam finding: BMI percentile;
- **Numerator 2**
  - Communication to patient: counseling for nutrition;
- **Numerator 3**
  - Communication to patient: counseling for physical activity
- **Exclusions**
  - None;
- **Stratified**
  - According to age with three numerators each

# Alt Core: NQF-0041: Influenza Immunization Patients > 50 Years

## • Initial Patient Population

- Age  $\geq$  50 years;
- AND:
  - OR:  $\geq$ 2 count(s) of outpatient encounter;
  - OR:  $\geq$ 1 count(s) of:
    - OR: preventive medicine encounter 40 and older;
    - OR: preventive medicine group counseling;

## • Denominator

- All patients in the initial population;
- AND: an encounter after the

first of September before the measurement period;

- AND: an encounter before March in the measurement period

## • Numerator

- AND: Medication administered: influenza vaccine;

## • Exclusions

- Influenza immunization contraindication, declined, patient reason or medical reason;

# Alt Core: NQF 0038:

## Childhood Immunization Status

- **Initial Patient Population**
  - Age  $\geq 1$  year and  $< 2$  years to capture all patients who will reach 2 years during the measurement period;
- **Denominator**
  - All patients in the initial patient population;
  - AND: outpatient encounter w/PCP & obgyn;
- **All Numerators**
  - Measuring appropriate immunization status
- **Numerator 1**
  - DTaP immunizations before 2 years of age
- **Numerator 2**
  - IPV before 2 years of age
- **Numerator 3**
  - MMR before 2 years of age
- **Numerator 4**
  - HiB between 42 days and 2 years
- **Numerator 5**
  - HepB before 2
- **Numerator 6**
  - VSV before 2
- **Numerator 7**
  - Pneumococcal bet 42 days and 2 years
- **Numerator 8**
  - HepA before 2 years
- **Numerator 9**
  - Rotavirus before 2 years
- **Numerator 10**
  - Influenza after 180 days and before 2 years
- **Numerator 11**
  - DTaP, IPV, MMR, VSV, HepB
- **Numerator 12**
  - DTaP, IPV, MMR, VSV, HepB, Pneumococcal

# Optional Quality Measures – Diabetes

- Hemoglobin A1c Poor Control
- Low Density Lipoprotein (LDL) Management and Control
- Blood Pressure Management
- Retinopathy: Documentation of Presence or Absence of Macular Edema and Level of Severity of Retinopathy
- Retinopathy: Communication with the Physician Managing Ongoing Diabetes Care
- Eye Exam
- Urine Screening
- Foot Exam
- Hemoglobin A1c Control (<8.0%)

# Optional Quality Measures – Cardiovascular Disease

- Coronary Artery Disease (CAD):
  - Beta-Blocker Therapy for CAD Patients with Prior Myocardial Infarction (MI)
  - Oral Antiplatelet Therapy Prescribed for Patients with CAD
  - Drug Therapy for Lowering LDL-Cholesterol
- Heart Failure (HF):
  - Beta-Blocker Therapy for Left Ventricular Systolic Dysfunction (LVSD)
  - ACE Inhibitor or ARB Therapy for Left Ventricular Systolic Dysfunction (LVSD)
  - Warfarin Therapy Patients with Atrial Fibrillation
- Ischemic Vascular Disease (IVD)
  - Blood Pressure Management
  - Use of Aspirin or Another Antithrombotic
  - Complete Lipid Panel and LDL Control

# Optional Quality Measures – Prevention

- Influenza Immunization for Patients  $\geq$  50 Years Old
- Pneumonia Vaccination Status for Older Adults
- Breast Cancer Screening
- Colorectal Cancer Screening
- Cervical Cancer Screening
- Chlamydia Screening for Women
- Prenatal Care:
  - Screening for Human Immunodeficiency Virus (HIV)
  - Prenatal Care: Anti-D Immune Globulin
- Weight Assessment and Counseling for Children and Adolescents
- Childhood Immunization Status

# Optional Quality Measures – Other

- Appropriate Use:
  - Appropriate Testing for Children with Pharyngitis
  - Prostate Cancer: Avoidance of Overuse of Bone Scan for Staging Low Risk Prostate Cancer Patients
  - Low Back Pain: Use of Imaging Studies
- Asthma:
  - Pharmacologic Therapy
  - Asthma Assessment
  - Use of Appropriate Medications for Asthma

# Optional Quality Measures – Other

- Smoking and Tobacco Use:
  - Advising Smokers and Tobacco Users to Quit
  - Discussing Cessation Medications and Strategies
- Alcohol and Other Drug Dependence Treatment:
  - Initiation
  - Engagement
- Anti-depressant medication management:
  - Effective Acute Phase Treatment
  - Effective Continuation Phase Treatment
- Oncology:
  - Hormonal Therapy for Stage IC-IIIC Estrogen Receptor/  
Progesterone Receptor (ER/PR) Positive Breast Cancer
  - Chemotherapy for Stage III Colon Cancer Patients
- Primary Open Angle Glaucoma (POAG): Optic Nerve Evaluation
- Controlling High Blood Pressure

# Measure Specification: “Human Readable”

**Prenatal Care: Anti-D Immune Globulin (NQF 0014)**

EMeasure Name	Prenatal Care: Anti-D	EMeasure Id	Pending
---------------	-----------------------	-------------	---------

Version Number: [ ]  
 Available Date: [ ]  
 Measure Status: [ ]  
 Endorsed By: [ ]  
 Description: [ ]  
 Measure source: [ ]  
 Measure type: [ ]  
 Rationale: [ ]  
 Clinical Recommendation Statement: [ ]

The USPSTF recommends the repeated Rh (D) antibody testing for all unsensitized Rh (D)-negative women at 24-28 weeks gestation, unless the biological father is known to be Rh (D)-negative (USPSTF [B Recommendation]).

**References**

**Table of Contents**

- Population
- Data
- Summary

*Please refer to the following sections for more information:*

**Population**

- Initial Patient
- Denominator

**Data criteria (QDS Data)**

- Initial Patient
  - "Diagnosis code list"
  - "Procedure performed"
- Numerator
- Denominator
  - All patients
  - "Diagnosis simultaneous"
  - "Diagnosis measurement"
  - "Laboratory test result"

**Exclusions =**

- OR:
  - AND:
    - OR: "Medication administered not done: Patient reason" for "Anti-D Immune Globulin RxNorm Code List"
  - "Laboratory test result: Rh status baby" using the "encounter Rh status baby code list" before or simultaneously to "Procedure performed: delivery live births-procedure";
  - "Diagnosis: multigravida" using the "multigravida code list" during the "measurement period";
  - "Encounter: prenatal visit" using the "prenatal visit code list" after "Patient characteristic: estimated date of conception";

**Numerator =**

- "Patient characteristic: estimated date of conception" using the "estimated date of conception code list" before "Procedure performed: delivery live births-procedure";
- "Medication administered: anti-D immune globulin" using the "anti-D immune globulin code list grouping";

**Exclusions =**

- "Medication not done: patient reason" using the "patient reason code list" for "anti-D immune globulin";
- "Medication not done: medical reason" using the "medical reason code list" for "anti-D immune globulin";
- "Medication not done: system reason" using the "system reason code list" for "anti-D immune globulin";
- "Medication not done: anti-D immune globulin declined" using the "anti-D immune globulin declined code list" for "Medication administered: anti-D immune globulin";

**Summary Calculation**

Calculation is generic to all measures:

- Calculate the final denominator by adding all that meet denominator criteria.
- Subtract from the final denominator all that do not meet numerator criteria yet also meet exclusion criteria. Note some measures do not have exclusion criteria.
- The performance calculation is the number meeting numerator criteria divided by the final denominator.
- For measures with multiple patient populations, repeat this process for each patient population and report each result separately.
- For measures with multiple numerators, calculate each numerator separately within each population using the paired exclusion.

Measure set: CLINICAL QUALITY MEASURE SET 2011-2012

# How do you know if your EHR is Certified?

- To achieve Meaningful Use, one must use a ONC Authorized Testing and Certification Body (ONC-ATCB) certified EHR
- Listings of the EHRs and what they certified upon can be found at:
  - <http://healthit.hhs.gov/chpl>
- This is what you will find...

# ONC Certified EHR Products List

## Certified Health IT Product List

The Office of the National Coordinator for Health Information Technology

HealthIT.HHS.Gov

The Certified HIT Product List (CHPL) provides the authoritative, comprehensive listing of Complete EHRs and EHR Modules that have been tested and certified under the Temporary Certification Program maintained by the Office of the National Coordinator for Health IT (ONC). Each Complete EHR and EHR Module listed below has been certified by an ONC-Authorized Testing and Certification Body (ONC-ATCB) and reported to ONC. Only the product versions that are included on the CHPL are certified under the ONC Temporary Certification Program.

Please send suggestions and comments regarding the Certified Health IT Product List (CHPL) to [ONC.certification@hhs.gov](mailto:ONC.certification@hhs.gov), with "CHPL" in the subject line.

Vendors or developers with questions about their product's listing should contact the ONC-Authorized Testing and Certification Body (ONC-ATCB) that certified their product.

### USING THE CHPL WEBSITE

To browse the CHPL and review the comprehensive listing of certified products, follow the steps outlined below:

1. Select your practice type by selecting the Ambulatory or Inpatient buttons below
2. Select the "Browse" button to view the list of CHPL products

To obtain a CMS EHR Certification ID, follow the steps outlined below:

1. Select your practice type by selecting the Ambulatory or Inpatient buttons below
2. Search for EHR Products by browsing all products, searching by product name or searching by criteria met
3. Add product(s) to your cart to determine if your product(s) meet 100% of the required criteria
4. Request a CMS EHR Certification ID for CMS registration or attestation from your cart page

### STEP 1: SELECT YOUR PRACTICE TYPE

# Choice to Search or Browse

The screenshot shows the 'Certified Health IT Product List' page. At the top, there is a blue header with the title and the HealthIT.HHS.Gov logo. Below the header, a dark blue bar indicates 'STEP 2: SEARCH FOR CERTIFIED EHR PRODUCTS'. The main content area contains three search options: 'Browse All Ambulatory Products' with a 'Browse' button, 'Search by Name or CHPL Product Number' with a dropdown menu for 'Product Name' and a 'Search' button, and 'Search by Criteria Met' with a 'Search' button. A footer section contains links to the ONC HIT Website and Privacy Policy, the last modified date (02/10/2011), and a statement about the page's hosting by the HITRC.

Your Search Results: Showing 1-25 of 809 Products Found

## STEP 3: ADD PRODUCTS TO YOUR CART

To add products to your cart, select the "Add to Cart" link in the far-right column. After adding a product to your cart, you will be directed to your cart page. Once on the cart page you can view the criteria met by the product(s) in your cart. Once the product(s) in your cart meet 100% of the required criteria you can obtain a CMS EHR Certification ID.

You can sort on any column in the table below. To sort, click on the column header and the arrow will confirm you are sorting in ascending or descending order.

# The Shopping Cart...

## STEP 4: REQUEST CMS EHR CERTIFICATION ID

### Certification Bar Summary

The bar below provides a summary of the criteria that are met by items in your cart. Criteria highlighted in blue have been met by products in the cart, criteria in gray have not.

Note: Certification criterion 170.302(w) is optional for the purposes of certification. If w is gray in the bar below, the product(s) in your cart can still meet 100% of the required certification criteria.

Place your mouse over the individual letters to learn more about each criterion.

General Criteria (170.302)

a b c d e f g h i j k l m n o p q r s t u v w

Ambulatory Criteria (170.304)

a b c d e f g h i j

### Requesting Your CMS EHR Certification ID

If the products in your cart meet 100% of the required criteria, you can now obtain a CMS EHR Certification ID.

**If the products in you cart do not meet 100% of the required criteria, select the "Return to Search" link and continue adding products to your cart until your cart meets 100% of the required criteria.**

# Criteria Descriptions

[General Criteria \(170.302\)](#) | [Ambulatory Criteria \(170.304\)](#) | [Ambulatory Clinical Quality Measures](#) | [Inpatient Criteria \(170.306\)](#) | [Inpatient Clinical Quality Measures](#)

## General Criteria (170.302)

### (a) Drug-drug, drug-allergy interaction checks

Drug-drug, drug-allergy interaction checks. (1) Notifications. Automatically and electronically generate and indicate in real-time, notifications at the point of care for drug-drug and drug-allergy contraindications based on medication list, medication allergy list, and computerized provider order entry (CPOE). (2) Adjustments. Provide certain users with the ability to adjust notifications provided for drug-drug and drug-allergy interaction checks.

### (b) Drug formulary checks

Drug formulary checks. Enable a user to electronically check if drugs are in a formulary or preferred drug list.

### (c) Maintain up-to-date problem list

Maintain up-to-date problem list. Enable a user to electronically record, modify, and retrieve a patient's problem list for longitudinal care in accordance with: (1) The standard specified in §170.207(a)(1); or (2) At a minimum, the version of the standard specified in §170.207(a)(2).

### (d) Maintain active medication list

Maintain active medication list. Enable a user to electronically record, modify, and retrieve a patient's active medication list as well as medication history for longitudinal care.

### (e) Maintain active medication allergy list

Maintain active medication allergy list. Enable a user to electronically record, modify, and retrieve a patient's active medication allergy list as well as medication allergy history for longitudinal care.

### (f) Record and chart vital signs

170.302(f)(1) Record and Chart Vital signs. Enable a user to electronically record, modify, and retrieve a patient's vital signs including, at a minimum, the height, weight, and blood pressure. 170.302(f)(2) Calculate Body mass index. Automatically calculate and display body mass index (BMI) based on a patient's height and weight. 170.302(f)(3) Plot and display growth charts. Plot and electronically display, upon request, growth charts for patients 2-20 years old.

### (g) Smoking status

Smoking status. Enable a user to electronically record, modify, and retrieve the smoking status of a patient. Smoking status types must include: current every day smoker; current some day smoker; former smoker; never smoker; smoker, current status unknown; unknown if ever smoked.

### (h) Incorporate laboratory test results

Incorporate laboratory test results. 1) Receive results. Electronically receive clinical laboratory test results in a structured format and display such results in human readable format. 2) Display test report information. Electronically display all the information for a test report specified at 42 CFR 493.1291(c)(1) through (7). 3) Incorporate results. Electronically attribute, associate, or link a laboratory test result to a laboratory order or patient record.

# Outline

- Background to the Final Rule
- Financial Incentives for Professionals
- Elements of Meaningful Use
- Proposed Stage II Criteria
- Quality Measures
- Knowing if Your EHR is Certified
- **Registration and Attestation**
- Capturing the Information
- Closure

# Incentive Program Registration & Attestation System

- Central registration point for both Medicaid and Medicare EHR incentives
- Ensure no duplication of payments between Medicare and Medicaid and between states
- Allows Medicare to meet its mandate for online posting requirements
- Tracks EHR incentives nationally
- Ensures accurate and timely payments

# Registration

- All eligible professionals must have an active NPI number and National Plan and Provider Enumeration System (NPPES) web user account.
- Eligible professionals will use their NPPES user ID and password to log in to the registration site.
- You will be directed to the NPPES site from the registration site if you do not have an NPI or NPPES number

# Important Dates

- April 18, 2011
  - Attestation for the Medicare EHR Incentive Program began.
- May 2011
  - EHR Incentive Payments began.
- October 3, 2011
  - Last day for eligible professionals to begin their 90-day reporting period for calendar year 2011 for the Medicare EHR Incentive Program.
- December 31, 2011
  - Reporting year ends for eligible professionals.
- February 29, 2012
  - Last day for eligible professionals to register and attest to receive an Incentive Payment for calendar year (CY) 2011

# Registration: Eligible Professionals

- Login to the Registration and Attestation System
- Select Program (Medicare or Medicaid)
- Enter Eligible Professional Type
- State you have a certified EHR
  - The Certified EHR Number is not required at point of registration
  - Required for attestation
- Pick a SSN or TIN for incentive receipt
- Complete the registration
- You will receive notification when your registration is accepted

# After Registration and Before Attestation

- You may continue incomplete registration
- Modify existing registration
- Switch incentive program (Medicare Medicaid) without penalty
- Switch Medicaid state
- Cancel participation

# Attestation

- Log in the Registration / Attestation site
- Include you EHR Certification number
- Walk through the core criteria
- Select and report on the menu criteria
- Report numerator and denominators for quality measures
- Select and report on the three menu quality measures

# Attestation Instructions

[http://www.cms.gov/EHRIncentivePrograms/32\\_Attestation.asp](http://www.cms.gov/EHRIncentivePrograms/32_Attestation.asp)

The screenshot shows the CMS website interface. At the top, there is a navigation bar with the U.S. Department of Health & Human Services logo and the URL www.hhs.gov. Below that is the CMS logo and the text "Centers for Medicare & Medicaid Services". A search bar is located on the right side of the navigation bar. The main navigation menu includes links for Home, Medicare, Medicaid, CHIP, About CMS, Regulations & Guidance, Research, Statistics, Data & Systems, Outreach & Education, and Tools. Below the navigation menu, there is a secondary menu with links for People with Medicare & Medicaid, Questions, Careers, Newsroom, Contact CMS, Acronyms, Help, Email, and Print. The breadcrumb trail reads: CMS Home > Regulations and Guidance > EHR Incentive Programs > Attestation. The main content area is titled "EHR Incentive Programs" and "Attestation". The "EHR Incentive Programs" sidebar lists various topics, with "Attestation" highlighted. The main content area contains the following text: "Attestation for the Medicare Electronic Health Record (EHR) Incentive Program opened April 18<sup>th</sup>. Click [here](#) to attest." followed by the question "What do I need to do to receive my Medicare EHR incentive payment?" and a list of three steps: 1. Successfully register for the Medicare EHR Incentive Program; 2. Meet meaningful use criteria using certified EHR technology; and 3. Successfully attest, using CMS' Web-based system, that you have met meaningful use criteria using certified EHR technology. Below this is the question "Did you register for the Medicare and/or Medicaid EHR Incentive Programs?" followed by a paragraph encouraging providers to register as soon as possible. Then, the question "Do you have questions about attestation?" is followed by a paragraph and a list of ten links: How will I attest for the Medicare and Medicaid Incentive Programs?, When can I attest?, What can I do now to prepare for attestation?, Where can I find user guides and other resources?, What will I need to login to the Attestation System?, What is the EHR Certification Number?, I am an Eligible Provider. Can I designate a third party to register and/or attest on my behalf?, When will I get paid?, How will I get paid?, and Will CMS conduct audits?. Finally, the question "How will I attest for the Medicare and Medicaid Incentive Programs?" is followed by a paragraph explaining that Medicare eligible professionals, eligible hospitals and critical access hospitals will have to demonstrate meaningful use through CMS' web-based Registration and Attestation System.

# Attestation Worksheet

## Eligible Professional (EP) Attestation Worksheet for the Medicare Electronic Health Record (EHR) Incentive Program

The EP Attestation Worksheet allows EPs to log their meaningful use measures on this page to use as a reference when attesting for the Medicare EHR Incentive Program in the CMS system.

Numerator, denominator, and exclusion information for clinical quality measures (CQMs) must be reported directly from information generated by certified EHR technology and are not included in this worksheet. However, information for the remaining meaningful use core and menu set measures does not necessarily have to be entered directly from information generated by certified EHR technology. For each objective with a percentage-based measure, certified EHR technology must include the capability to electronically record the numerator and denominator and generate a report including the numerator, denominator, and resulting percentage for these measures. However, EPs may use additional data to calculate numerators and denominators and to generate reports on all measures of the core and menu set meaningful use objectives except CQMs. In order to provide complete and accurate information for certain of these measures, EPs may also have to include information from paper-based patient records or from records maintained in uncertified EHR technology.

EPs can enter their meaningful use criteria in the blue boxes. Each measure's objective is included to help EPs enter the correct criteria. Certain measures do not require a numerator and denominator, but rather a yes/no answer, and are marked as such. Measures with exclusions have the exclusion description listed in the measure information section.

**Note:** Claiming an exclusion for a specific measure qualifies as submission of that measure. If an EP claims an exclusion for which they qualify, indicate this in the Attestation System by clicking "yes" under the exclusion part of the measure question.

EPs must meet report on the following:

- All 15 of the core measures  
**Note:** One of the required core measures is that EPs report clinical quality measures (CQMs)
- 5 out of 10 of the menu measures; at least 1 public health measure must be selected
- A sum total of up to 9 CQMs; 3 core, up to 3 alternate core, and 3 additional CQMs. If an EP reports a denominator of 0 for any of the 3 core measures, the EP must record for an alternate core CQM to supplement the core measure. Therefore, an EP may report a minimum of 6 and a maximum of 9 CQMs depending on the resulting values in the denominators for the core measures as reported from their certified EHR.

*Reporting Period: For an EP the reporting period must be at least 90 consecutive days within calendar year 2011 (January 1, 2011, through December 31, 2011).*

## Meaningful Use Core Measures- EPs must fill out all 15 core measures

#	Measure Information	Measure Values
1	<p><b>Objective:</b> Use computerized provider order entry (CPOE) for medication orders directly entered by a licensed healthcare professional who can enter orders into the medical record per state, local and professional guidelines</p> <p><b>Measure:</b> More than 30 percent of all unique patients with at least one medication in their medication list seen by the EP have at least one medication order entered using CPOE</p> <p><b>Exclusion:</b> Any EP who writes fewer than 100 prescriptions during the EHR reporting period would be excluded from this requirement</p>	<p>Does this exclusion apply to you? Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>Numerator: The number of patients in the denominator that have at least one medication order entered using CPOE <input type="text"/></p> <p>Denominator: Number of unique patients with at least one medication in their medication list seen by the EP during the EHR reporting period <input type="text"/></p>
2	<p><b>Objective:</b> Implement drug-drug and drug-allergy interaction checks</p> <p><b>Measure:</b> The EP has enabled this functionality for the entire EHR reporting period</p> <p><b>Note:</b> This measure only requires a yes/no answer</p>	<p>Numerator: N/A</p> <p>Denominator: N/A</p> <p><input type="checkbox"/> YES <input type="checkbox"/> NO</p>
3	<p><b>Objective:</b> Maintain an up-to-date problem list of current and active diagnoses</p> <p><b>Measure:</b> More than 80 percent of all unique patients seen by the EP have at least one entry or an indication that no problems are known for the patient recorded as structured data</p>	<p>Numerator: Number of patients in the denominator who have at least one entry or an indication that no problems are known for the patient recorded as structured data in their problem list <input type="text"/></p> <p>Denominator: Number of unique patients seen by the EP during the EHR reporting period <input type="text"/></p>
4	<p><b>Objective:</b> Generate and transmit permissible prescriptions electronically (eRx)</p> <p><b>Measure:</b> More than 40 percent of all permissible prescriptions written by the EP are transmitted electronically using certified EHR technology</p> <p><b>Exclusion:</b> Any EP who writes fewer than 100 prescriptions during the EHR reporting period would be excluded from this requirement</p>	<p>Does this exclusion apply to you? Yes <input type="checkbox"/> No <input type="checkbox"/></p> <p>Numerator: Number of prescriptions in the denominator generated and transmitted electronically <input type="text"/></p> <p>Denominator: Number of prescriptions written for drugs requiring a prescription in order to be dispensed other than controlled substances during the EHR reporting period <input type="text"/></p>

# Register Now

- Professionals
  - May register for the Medicare program and attest to meaningful use now
  - May not select the Medicaid program until state Medicaid program ready
  - Recommend registering early to be sure all information is available and correct
- State readiness:

- Closure

# The Patient Experience

- Margaret is a 48-year-old diabetic patient, known to the clinic, believed to be under good control, comes in to refill her medications. Due to your success with open access scheduling, the front desk was able to get her in the next day. She has been staying with her cousin in San Diego for 6 months and is now home. Though you have been live on the EHR for several months, this visit was unexpected and so you have not loaded her information from the paper chart. Take the criteria and measures listed on the next slides and identify where on the patient experience timeline (starting with when she makes the appointment to when she leaves the clinic to go home) where each of the measures can be collected or met during the visit. Hint: each criteria and measure can appear in several different places on the time line and can be either collected or verified by multiple staff.

# The Criteria

- CPOE
- ePrescribe
- Demographics
- Problem List
- Med List
- Med Allergies
- Vitals
- Smoking
- Visit summaries
- Decision Support
- Quality Reporting
- eHealth summary
- Drug (D-A, D-D) Interactions
- Exchange with providers
- Protect Patient Personal Health Information
- Reminders
- eResults
- Patient Ed
- Medication reconciliation
- Summary care record for referrals
- Immunization Records
- Formularies
- Lab Results
- Patient Lists
- Syndromic Surveillance

# The Measures

- Blood pressure measurement
- Tobacco use assessment and intervention
- Adult Weight Screening and Follow-up
- Diabetes Mellitus: Hemoglobin A1c Poor Control in Diabetes Mellitus
- Diabetes: Low Density Lipoprotein (LDL) Management and Control
- Diabetes: Blood Pressure Management
- Diabetes: Eye Exam
- Diabetes: Urine Screening
- Diabetes: Foot Exam
- Diabetes: Hemoglobin A1c Control (<8.0%)

# CMS Meaningful Use Website

<https://www.cms.gov/EHRIncentivePrograms/>

The screenshot shows the CMS website interface. At the top, there is a navigation bar with the U.S. Department of Health & Human Services logo and the URL www.hhs.gov. Below this is the CMS logo and the text "Centers for Medicare & Medicaid Services". A search bar is located on the right side of the navigation bar. The main navigation menu includes links for Home, Medicare, Medicaid, CHIP, About CMS, Regulations & Guidance, Research, Statistics, Data & Systems, Outreach & Education, and Tools. A secondary navigation bar contains links for People with Medicare & Medicaid, Questions, Careers, Newsroom, Contact CMS, Acronyms, Help, Email, and Print. The breadcrumb trail reads: CMS Home > Regulations and Guidance > EHR Incentive Programs > Overview. The main content area is divided into two columns. The left column, titled "EHR Incentive Programs", contains a list of links: Overview, Path to Payment, Eligibility, Registration, Certified EHR Technology, CMS EHR Meaningful Use Overview, Attestation, Medicare and Medicaid EHR Incentive Program Basics, Medicaid State Information, Medicare Advantage, Spotlight and Upcoming Events, Educational Materials, EHR Incentive Program Regulations and Notices, CMS EHR Incentive Programs Listserv, and Frequently Asked Questions (FAQs). The right column, titled "Overview", features the EHR Incentive Program logo, which consists of a green and blue stylized "EHR" with "INCENTIVE PROGRAM" written below it. The text in the Overview section reads: "The Official Web Site for the Medicare and Medicaid Electronic Health Records (EHR) Incentive Programs". It then states: "The Medicare and Medicaid EHR Incentive Programs will provide incentive payments to eligible professionals, eligible hospitals and critical access hospitals (CAHs) as they adopt, implement, upgrade or demonstrate meaningful use of certified EHR technology." Below this, it says: "Registration for the Medicare and Medicaid EHR Incentive Program is now open. Participate early to get the maximum incentive payments!" and "Attestation for the Medicare EHR Incentive Program is now open. Visit the Attestation page for more information." It then says: "Check on the links below for up-to-date, detailed information about the Electronic Health Record (EHR) Incentive Programs." and lists five links: Path to Payment, Overview of the Medicare EHR Incentive Program, Overview of the Medicaid EHR Incentive Program, Calendar of important dates, and Downloads and related links.

## I. Questions about Getting Started

### EHR Incentive Programs 101

#### 1) When do the Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs start?

Participation in the Medicare EHR Incentive Program can begin as early as 2011; The incentive program ends in 2016. Registration for the Medicare EHR Incentive Program began on January 3, 2011 and is available online at <https://ehrincentives.cms.gov>. Attestation is expected to begin in April 2011. The earliest incentive payments to eligible professionals (EPs) and eligible hospitals are expected to be made in May 2011.

Please note that although the Medicaid EHR Incentive Programs will begin January 3, 2011, not all states will be ready to participate on this date. The program will end in 2021. Information on when registration will be available for Medicaid EHR Incentive Programs in specific States is posted at [http://www.cms.gov/EHRIncentivePrograms/40\\_MedicaidStateInfo.asp](http://www.cms.gov/EHRIncentivePrograms/40_MedicaidStateInfo.asp). Participants in the Medicaid EHR Incentive Program should consult their State for specific information regarding attestation and payment.  
Date Updated: 2/17/2011  
ID #10080

#### 2) How will eligible professionals (EPs) and eligible hospitals apply for incentives under the Medicare and Medicaid Electronic Health Record (EHR) Incentive Program?

Registration for the Medicare EHR Incentive Program began on January 3, 2011 and is available online at <https://ehrincentives.cms.gov>. Please note that although the Medicaid EHR Incentive Programs will begin January 3, 2011, not all states will be ready to participate on this date. Information on when registration will be available for Medicaid EHR Incentive Programs in specific States is posted at [http://www.cms.gov/EHRIncentivePrograms/40\\_MedicaidStateInfo.asp](http://www.cms.gov/EHRIncentivePrograms/40_MedicaidStateInfo.asp).  
Date Updated: 1/3/2011  
ID #9814

#### 3) When can I register and where do I register for the Medicare and Medicaid Electronic Health Record (EHR) Incentive Programs?

Registration for the Medicare EHR Incentive Program began on January 3, 2011 and is available for eligible professionals (EPs), eligible hospitals and critical access hospitals (CAHs) online at <https://ehrincentives.cms.gov>. Please note that although the Medicaid EHR Incentive Programs will begin January 3, 2011, not all states will be ready to participate on this date. Information on when registration will be available for Medicaid EHR Incentive Programs in specific States is posted at [http://www.cms.gov/EHRIncentivePrograms/40\\_MedicaidStateInfo.asp](http://www.cms.gov/EHRIncentivePrograms/40_MedicaidStateInfo.asp).

# In Review

- The EHR Incentive program is intended to encourage the health care industry to adopt and meaningfully use health information Technology
- Incentives are available for professionals who adopt certified EHR technology and meaningfully use it
- Meaningful use will require the submission of quality measures
- Criteria for meaningful use will become more demanding over time and improvement of quality will likely be required for payment increases
- Efficient and accurate collection of patient information and improvement of quality measures will require close attention to workflow
- Use reports on a regular basis to track your progress to meaningful use of your EHR and to improved quality

# Thank you!
